Summary

I am a solutions-driven Software Developer and Data Analyst with a degree in Informatics. I bridge the gap between robust technical logic, data-driven insights, and intuitive visual design, ensuring every digital product I build is both functional and empirically validated. By combining modern development workflows with data interpretation, I transform complex datasets and operational requirements into accessible applications that empower informed decision-making and deliver a seamless user experience.

Experience

Dinas Komunikasi dan Informasi Provinsi Jawa Tengah

Semarang, Indonesia

Software Developer Intern (August – October 2025)

- Developed a new enterprise event management system from scratch using Laravel 11 to replace an abandoned legacy application.
- Engineered a responsive, mobile-ready architecture, allowing the web application to be installed and function seamlessly as a mobile WebView client.
- Designed and implemented a multi-role administrative dashboard with a completely new, user-friendly UI/UX component hierarchy.
- Transformed manual attendance into a fully digital system, now actively used and accessible remotely.
- Built integrated features such as QR-based digital attendance and live material distribution within a lean agile team.

Darussalam Printing and Publishing

Ponorogo, Indonesia

IT & System Administrator (July 2021 – May 2022)

- Managed and optimized the company's local IT infrastructure, including hardware components and network systems, to ensure seamless daily operations.
- Executed data recovery procedures for damaged storage devices and established structured backup protocols to guarantee long-term data security.
- Architected a centralized storage system for company operational data, significantly improving data accessibility and cross-departmental workflow efficiency.
- Provided day-to-day technical support and resolved hardware/software bottlenecks for both print production teams and non-technical staff.

HIPMI Amikom (Young Entrepreneurs Association)

Sleman, Indonesia

PDD Division Member | (March 2024 – February 2025)

- Spearheaded the visual identity and digital promotional campaigns for a student entrepreneurship organization across multiple social media platforms.
- Translated raw data and conceptual briefs from cross-functional divisions into structured, engaging, and accessible visual content.
- Designed and standardized event publication materials, ensuring on-brand consistency and clear visual communication for all organizational activities.
- Collaborated tightly with various divisions to support operational workflows, turning abstract ideas into cohesive digital assets.

National Seminar Committee – Universitas Amikom Yogyakarta

Sleman, Indonesia

Creative Coordinator | September 2024

- Led the end-to-end creative direction for a national seminar, designing audience-centric visual assets that successfully supported the acquisition and engagement of 300+ attendees.
- Established a standardized design system (color direction and visual hierarchy), ensuring visual consistency and improving information accessibility across all event platforms.
- Coordinated a multi-format design pipeline (posters, social media, on-site materials) by tracking deliverable metrics to ensure 100% on-time execution.
- Collaborated with cross-functional committees to translate promotional data and event briefs into targeted, high-impact stage graphics and branding materials.

Universitas Amikom Yogyakarta

Sleman, Indonesia

Teaching Assistant (Graphic Design) | (Mar 2023 – Jan 2024)

- Facilitated hands-on practical sessions for 40+ undergraduate students, breaking down complex UI/UX principles and visual layout theories into structured, actionable learning modules.
- Evaluated student project submissions by establishing objective grading criteria, transforming subjective design concepts into measurable performance metrics.
- Guided students in applying systematic design frameworks—including layout hierarchy, color theory, and visual composition—to create accessible and consistent digital assets.
- Delivered structured, iterative feedback on design outputs, simulating real-world tech industry reviews to improve students' technical execution and problem-solving skills.

Education & Training

Universitas Amikom Yogyakarta

Bachelor of Informatics | 2022 – 2026 | GPA: 3.82 / 4.00

- Concentration: Programming and Database Systems
- Achievement: 1st Place – National Poster Competition, PIMAPOSMA 2022

Data Analyst for BNSP Certification Preparation

YEC.co.id | July 2026

- Learned fundamental data analysis concepts, SQL, data preprocessing, and data visualization.
- Strengthened analytical thinking and problem-solving skills through hands-on exercises.

SQL Fundamental

SmartPath | June 2024

- Learned SQL fundamentals, including data retrieval, filtering, sorting, joins, grouping, and aggregate functions.
- Practiced writing SQL queries for database management and reporting.

InJourney Hospitality House

InJourney Destinations | June 2026

- Participated in professional development sessions covering workplace communication, teamwork, and service excellence.
- Improved interpersonal communication and collaboration skills in a professional environment.

Projects

Esensi – Enterprise Event Management System.

<https://cs.saturnalia.jatengprov.go.id/>

An internal event management system for Diskominfo Jawa Tengah, centralizing event operations across departments within a single platform.

Skin Checker AI

<https://skinchecker.my.id/>

An AI-powered web application that automates facial skin type classification to support skincare decisions.

SaliwangCatering Website

<https://saliwangcatering.site/>

A client-facing digital solution for a local catering UMKM, translating business requirements into a functional web presence.

WanajonggolPark Website

<https://wanajonggolpark.online/>

A web platform for a nature-based tourism and restaurant destination, built around a simple reservation flow.

Skills

-
- **Back-End & Database** : Laravel, PHP, Python, MySQL, SQL, C++, API Integration.
 - **Front-End & Mobile** : HTML/CSS, Tailwind CSS, JavaScript, Flutter, Web-View Architecture.
 - **UI/UX Design** : Figma, Wireframing, High-Fidelity Prototyping, User Research, Design System.
 - **Tools & Platforms** : Git, Postman, VS Code, Google Colab, Ubuntu, AI-Assisted Development.
 - **Methodologies & Systems:** Requirement Analysis, System Documentation, Software Testing, Business Process Understanding, Analytical Thinking, Agile Collaboration.
